ABOUT

I'm a Full Stack developer specialized in Backend services and a Cybersecurity student, enjoying building and designing exceptional applications. Currently, focused on working with clean, tested and scalable solutions. I'm working on freelance development projects, and looking for a job in IT.

EXPERIENCE

No country – *Backend Developer Junior*

AUGUST 2022 – PRESENT

- Participated in 3 application projects: one web(Vue JS) and two mobile(React Native)
- REST APIs development(Node JS, Express JS, Typescript) using architecture layers and design patterns
- Database connections(MySQL, MongoDB) using ORMs(Sequelize, Mongoose)
- Authentication and security(JWT, Passport, Oauth)
- Testing and documentation(Postman, Swagger)
- Service deployment on cloud platforms(Railway, Heroku)

EDUCATION

Coderhouse – *Full Stack Developer (MEVN)*

MARCH 2022 – PRESENT

Backend Development(on course)

- Back-end development. Node js, filesystems, web servers, Express js, websockets, databases(SQL, NoSQL), cookies, session, authentication, server optimization, clusters, proxy, logs, debug, profiling, cloud, security, design patterns and architecture layers, testing, documentation.

React JS

- Front-end development. JSX, components, mapping, APIs, navigation, routing, rendering, context. Finished the course in Top10 qualifications.
[Final project](#) [Certification](#)

Javascript

- Javascript basics. Loops, arrays, objects, events, DOM, JSON, storage, promises and async. Finished the course in Top10 qualifications. [Final project](#). [Certification](#)

Cisco Netacad – Cybersecurity Analyst

MARCH 2022 – PRESENT

Cybersecurity and Networking

- Identifying cyberattacks, scanning vulnerabilities, analyzing risks for the organization. OSI model and network protocols: DHCP, DNS, FTP, SMB, HTTP, SSH

GNU/Linux

- Installing and customizing OS. Administration of remote servers. Bash scripting for automation and configuration files. [Certification](#)

SKILLS

Backend

- Designing and building clean, scalable, tested and secured APIs with technologies like: Node JS, Typescript, Express JS, MongoDB, MySQL, Sequelize, Passport, Postman, JSON Web Tokens

Frontend

- Developing modern applications and user interfaces with technologies like: HTML5, CSS3, React JS, Tailwind CSS, Vite JS

Cloud

- Administrating, developing and deploying services with technologies like: Git, GNU/Linux, Bash, Docker, Nginx, Cloudflare. Currently studying AWS in [IT College](#)

Project Management

- Optimizing project development and enhancing teamwork communication with tools like: Jira, Trello, Slack, Discord

LANGUAGES

- English C2 Proficient. [EFSET Certification](#)
